

Great news!

The Town of Harrisburg has adopted STOPit, a technology platform that will help mitigate, deter, and control harmful and inappropriate behavior as well as provide transparency within our organization. STOPit will be an integral part of our effort to deter and mitigate risks associated with compliance incidents, ethical or legal violations, security threats, and HR issues, as well as to provide all employees with a safe and supportive working environment.

The Town has also partnered with STOPit Solutions as a means of communications for employees to make suggestions and recommendations about a variety of things whether its centralized to your respective department or an initiative that can potentially be implemented Town-wide.

The best part of it all is that you can remain **ANONYMOUS!!**

Watch this video to see how STOPit works!

You now have access to the STOPit mobile app, online version and employer hotline which you can use to:

- Anonymously report incidents in real time
- Submit photo and video evidence anonymously
- Access two-way anonymous communication to follow up on your reports **(for app and online version only)**
- Connect with compliance, legal, HR, and other resources
- Receive important notifications from the Town

FOR APP VERSION:

Download STOPit for free from your device's app store today!
